- **State Management & Tools:** RxJS, Git
- **Frameworks (Familiar):** React.js, Next.js, Ionic
- **Backend (Familiar):** Node.js, Express.js, MongoDB, Firebase.
- **Accessibility Tools:** AXE DevTools, NVDA Screen Reader, HeadingsMap

PROFESSIONAL EXPERIENCE

Front-End Developer

Thoughtwin IT Solution, Indore

Jan 2023 - Present

- Developed and maintained scalable and responsive Angular applications.
- Built reusable UI components, integrated REST APIs, and managed state with RxJS.
- Worked with cross-functional teams to design pixel-perfect web experiences.
- Conducted accessibility audits using AXE DevTools and implemented WCAG-compliant features.
- Version-controlled codebases using Git and participated in agile sprints and code reviews.

Key Projects

Tarlen (Car Rental Platform) — Angular + Ionic, Capacitor

- Implemented Twilio Segment to track user activity throughout the application.
- Optimized the codebase using various strategies and approaches for better app performance.
- Developed core functionalities including booking, user management, and data synchronization.
- Migrated outdated code to the latest Angular standards and replaced deprecated dependencies.
- Worked on Tarlen Admin Panel for managing platform operations and user data.

Dun & Bradstreet (Enterprise Data Platform) — Angular

- Focused on UI accessibility enhancements, structural markup, and performance tuning.
- Worked to improve accessibility and screen reader support across key user flows.
- Implemented ARIA roles, labels, and semantic HTML to support assistive technologies.
- Utilized AXE DevTools, NVDA Screen Reader, and HeadingsMap to audit and enhance accessibility compliance.

Post Your Cras (Used Car Selling Platform) — Angular+Ionic, Firebase.

- Implemented listing modules, car detail views, and location-based search.
- Developed a bid management system allowing buyers to place bids on cars, and enabling sellers to accept or deny bids based on their satisfaction with the offer.

Glorvia (Custom Dress Design Platform) — Vue.js, Babylon js.

- Developed a fashion brand platform that allows users to design and customize their own dresses online.
- Implemented a user-friendly interface in Vue.js for selecting and designing outfits with various options for tops, skirts, fabrics, and sizes.
- Utilized Babylon.js for 3D mapping to provide an interactive and realistic visualization of custom designs.
- Focused on delivering high-quality, made-to-measure outfits with a seamless user experience from design to delivery.

Drink The Drink (Beverage & Nightlife Discovery App) — Angular, Bootstrap

- Developed a platform for users to find bars and stores in their current or selected location, featuring an interactive map and location-specific data display.
- Digital platform to get hotspots for happy-hours.
- Get trending-event , happy-hours and gathering.

EDUCATION

- **Bachelor of Engineering (B.E) – Computer Science** (2018)
RGPV University, Bhopal
- **Diploma – Computer Science** (2015)
RGPV University, Bhopal

ADDITIONAL INFORMATION

- **Languages:** English, Hindi
- **Certifications:** Angular training certificate from code-better (Indore)
